

Aldesa Polska Services Sp. z o.o.

Construction

Aldesa is a construction company dealing with big road, tramway and railway infrastructure projects, construction of industrial farms, wind farms, information and security systems. Now, it is a general contractor for several stretches of expressways in Poland (S19 in the region of Podlasie and Lublin, S7 in Masovia and S6 in Pomerania) and a traffic management system on the S6 and S7 expressways. It is also reconstructing the Rataje traffic circle in Poznań, working on a passenger information system for PKP PLK and building a wind farm in Budzyń, in Greater Poland. In 2021 the company commissioned a tramway line to Stogi in Gdańsk, wind farms in Pomerania and Silesia and fuel tanks at PERN fuel base near Gdynia. Aldesa Polska forms part of Grupo Aldesa of Spain with more than 50 years of experience in the construction industry. Grupo Aldesa is a general contractor of infrastructure projects in Spain and countries of South America such as Mexico, Peru and Chile. It has long-term extensive experience in big road and railway projects and in construction of wind farms and power lines. In Poland, Aldesa has been present since 2007. In 2020 it established strategic partnership with CRCC - the largest railway company and third largest construction company in the world. CRCC, having huge railway projects in their portfolio - railways, fast railway lines, railway lines throughout China - is a company with an extensive know-how and major achievements in railway industry all over the world.
