

CSI-INVEST

Rolling stock | Maintenance | Service

The company CSI-INVEST was established in 2018. Its founders have long-term experience in the rail transport sector. The Company provides services in the following area:

- service repairs and maintenance of rail vehicles (from P1 to P5)
- modernisation of rail vehicles
- running repairs and overhauls
- repairs of rail vehicles after accidents
- sale and refurbishment of parts and subassemblies
- repairs of engines, transmission gears and whole drive units
- commissioning of rail vehicles
- repairs of vehicle control, air conditioning, and ventilation systems, ETHERNET, CAN, WC, SIP, SER, monitoring systems etc.
- repairs of side panels, laminates and replacement of vehicle front ends with new ones
- corrosion protection and painting of vehicles and their components
- technical consultancy.

As we continuously maintain a very high service level, we joined a group of companies that are managed according to the requirements of the international standard ISO/TS 22163:2017 (IRIS Certification rules: 2017). In addition, we implemented ECM requirements with RTO's certification for traction vehicles and passenger carriages. We also hold ISO 9001:2015 certificate and a certificate issued by Czech Railways.
