

NKN Usługi Kolejowe Sp. z o.o.

Transport | Maintenance

NKN Usługi Kolejowe Sp. z o.o. has operated as a railway carrier since 2006, providing its services throughout Poland. Its services include:

- freight and passenger transport
- shunting services
- lease of diesel locomotives
- hire of skilled staff (train drivers, setters, and rolling stock inspectors)
- technical inspection and repairs of locomotives and railway cars and wagons.

The company holds safety certificates parts A and B and is a licensed operator of railway passenger and cargo transport and traction services. It has SM42 and 401Da locomotives, own service maintenance facilities at the station Szczecin Gumieńce and a team of adequately skilled and experienced employees at its disposal. In addition to transport services, being its core activity, the company also provides services such as: development of complete logistics solutions in the area of railway transport, design of railway sidings, completion of construction projects, and complete sidetrack maintenance.
