

Przedsiębiorstwo Napraw i Utrzymania Infrastruktury Kolejowej w Krakowie Sp. z o.o.

Construction | Infrastructure

PNUIK means experience

- RAILWAY ENGINEERING
- ENGINEERING STRUCTURES
- TRACTION NETWORK
- RAILWAY TRAFFIC SIGNALLING
- RENTAL OF TRACK MACHINERY

We are a leader in the construction, repairs and modernisation of railway tracks and engineering structures. We have long-term experience in railway engineering and bridge engineering. We have specialist bridge engineering groups at our disposal. We have continuously expanded the scope of our services and operations. In 2018 we successfully entered the market of railway network energy and traction services. In the last quarter of 2020, we created a railway traffic signalling division in PNUIK Kraków Sp. z o.o. Its main task is railway traffic signalling construction works both during railway track maintenance and repairs and in performance of the company's investment tasks. In 2022, we supplied our machinery park with the most modern track and turnout tamper in Poland. We strive to improve and modernize the polish railways make them better, faster, safer and strength its position in land transport.
