

Sosnowski Sp. z o.o. Sp. k.

Infrastructure | Rolling stock

RAIL MAINTENANCE EQUIPMENT

The company SOSNOWSKI was established in 1992 and is one of the oldest suppliers of complete construction and supply of equipment for rolling stock service shops in Poland.

SOSNOWSKI has reliable credentials to the extent of:

- design and construction works, including works carried out as a general contractor of halls and special-purpose foundations
- train washing systems
- painting and blasting booths
- sand filling systems
- disposal system for emptying train toilet tanks
- engine testing stations
- prefabricated service pits
- bogie and wheelset drop tables
- rail maintenance turntables
- exhaust extraction for the railway
- railway lifting jacks and positioners
- mobile vehicles for rolling stock servicing.

The company Sosnowski has been adapting the solutions designed by the largest European manufacturers to match the individual requirements of the Polish railway market and suit the type of rolling stock used in Poland. More than 50 companies from the Polish railway market, including the largest railway carriers, manufacturers and rolling stock repair shops, have trusted Sosnowski as an experienced supplier.
