YOUR POWERFUL PARTNER

Since the foundation in 1952 LANKWITZER has grown to an internationally successful company with the objective to offer industrial coatings of the highest quality.

More than 65 years of cross-industry experience are the basis of the success of our owner-managed cooperation. The love for technological innovations, the care for our uncompromising quality level, our deep understanding for the processes of our customers and the maximum service readiness are the lived values of our company philosophy. Our globally active employees are highly motivated and are the basis for the growth and success of our company.

“Despite all our growth, we have remained a family business. That is one of our major strengths. We are happy to take on this responsibility and can continue to develop our business successfully independently of investors. Our courage to innovate and develop individual technical solutions for our customers will continue to distinguish us in the future. This is only possible because team spirit, innovation and commitment are the values of our constantly growing team. A team that makes its contribution to the future already today”.

Dr. Leo Rokeach, Managing Director

THAT MAKES US A SPECIALIST IN THE FIELD OF RAIL VEHICLES

- High processing safety, ease of processing and weather resistance
- High boiling safety of the waterborne paint systems
- Long gloss retention and high graffiti resistance
- On-site support for painting processes, sophisticated logistics and just-in-time delivery possible
- Service portfolio from consulting and design development to production ready for series production
- Various approvals in the rail vehicle sector as well as fire protection approvals.

RAILWAY COATING

Interior, exterior or undercarriage - we supply you with precisely fitting coating systems for rail vehicles. In addition to the proven solvent-based coating systems, we offer water-based coating systems that are characterized by a high degree of boiling safety. In order to guarantee the best results in all applications, the individual adaptation of the products to the customer's manufacturing process is our main focus... after all, in addition to high demands on functionality, we also have high standards for the appearance of our processed coating systems.

The performance and broad application possibilities of our products and systems are closely linked to the potential of modern raw materials. In order to expand the existing product range and to find approaches for new applications, we work closely with renowned raw material suppliers. This enables us to constantly create new, tailor-made formulations that meet the requirements of our customers. We at LANKWITZER optimize the painting processes of our customers under ecological aspects and are always focused on the development of environmentally friendly products.

Our highly qualified development engineers and application specialists ensure that the development of individual system solutions is constantly coordinated with the customer.

We are here for you and will answer your inquiry as quickly and competently as possible. Of course,

we will treat your data confidentially in accordance with the legal regulations on tele- and media services.
